

Custom Blending Program

Custom Blends

Custom Blending is a specialized process of creating a unique and tailored product based on your proprietary recipe. Using our wide range of spices, herbs, and chile powders we will make your recipes custom just for you, and only you.

Since the price of a custom blend is determined by the cost of ingredients, we need to see your recipe before we can provide you with a quote for your blend. To get this process started, we'll send you a recipe template and signed Non-Disclosure Agreement (NDA) so you can rest assured that your recipe will be kept confidential. Both documents need to be completed, signed, and returned to us in order for us to create a test batch.

Spices, Inc. is a SQF (Safe Quality Food)-certified facility. Our facility, our protocols and our own suppliers are required to adhere to globally recognized standards, verified by annual third-party audits. Our practices are documented, our products are stringently monitored, our employees are rigorously trained.

YOUR RECIPE

To ensure the fastest turnaround of your recipe, all blend recipes should be equal to one pound (16 ounces) total. The ingredients should be submitted in ounces, with no ingredient measuring smaller than 1/10 (0.1) ounce. Recipes that do not equal a pound or are not broken down into ounces may be subject to a conversion fee.

We can usually determine if a product will blend successfully, so we may offer advice on certain ingredients. For example, we typically use granulated onion or garlic in blends rather than onion or garlic powder. As with all of our seasoning blends, we won't add any artificial flavorings, anti-caking agents, MSG, or preservatives to your recipe unless requested or unless an ingredient used already contains these. The suggested granulated ingredients are less likely to clump and we know from experience that they create a better end product. Recipes that contain more than 10 ingredients are typically more expensive due to the added labor. We do not allow blends that we currently make to be used in your blend.

It is important to note that our custom blending service is limited to the products available in our inventory. If you wish to include a specific ingredient or product in your custom blend that we currently do not carry, please contact us. We are open to exploring the option of sourcing new products to fulfill your individual preferences and needs.

After we've received your recipe and you've signed and returned your NDA, we'll make your test batch. Once the test batch has been completed, we will send it to you to approve the flavor profile, along with an email that includes a quote for your blend.

BULK MINIMUMS

The minimum for bulk custom blends is one batch, which is 100 pounds per SKU. That means that any orders of your custom blend would have to be at least 100 pounds and then you can order in increments of 50 pounds. See Discount Tiers page for information on discounts for larger orders.

SET-UP FEES

There is a one-time, non-refundable set-up fee of \$400 per recipe. The fee covers minor consultation services, two test batches, test batch shipping, and product setup. Additional fees will be incurred if you need more than two test batches for any one recipe, or for converting your recipe from volume (i.e. teaspoons, tablespoons, cups, etc) into ounces. Submitting multiple recipes at once may be subject to a discount. Please see the fees page below.

PACKAGING

Your blend typically comes in food grade plastic bags inside shipping boxes. We offer three jar sizes (see: Packaging Options) and can discuss pre-portioned batch packs.

STORAGE

All custom blends are made to order. We do not pre-make and store your blends in our production facility.

SHIPPING

To see the estimated shipping times from our facility in Pennsylvania to you, check our shipping page on the website.

Packaging Options

5.5 oz. Plastic Jar SJ1

MOST COST EFFECTIVE

Capacity	5.5 ounce
Height	4.74"
Diameter	2"
Color	clear
Material	Polyethylene Terephthalate (PET) Plastic
Label Area Height	3.36"
Label Area Diameter	1.81"
FDA Compliant	Yes
BPA Free	Yes
Lid	48/485 Shaker Lid - JL1
Lid Style	Dual Flapper, Full Pour, 3 Hole Sifter
Liner	Foam Liner
Lid Neck Width	48 mm
Lid Color	Black
Lid Material	Polypropylene Plastic
FDA Compliant Lid	Yes
BPA Free Lid	Yes
Perforated Shrink Band	JTS1 - Fits Cap Diameter from 1 3/4" - 2"
Perf. Shrink Band Size	86 x 56mm

4 oz. Glass Jar SJ2

HIGHEST QUALITY JAR

Capacity	4 ounce
Height	4.10"
Diameter	1.87"
Color	clear
Material	Glass
Label Area Height	3.20"
Label Area Diameter	1.87"

Minimums and Discount Tiers

All Jar Minimums Begin at 576 Units Per SKU
All Bulk Minimums Begin at 100 Pounds Per SKU

Jar Discount Tiers

Jar orders with one SKU at higher unit quantities are eligible for discounts beginning at 1152 units per SKU. Ordering larger unit quantities of your blend means your cost per jar will decrease.

Discounts will not apply to a mix and match order of several blends, in order to qualify for the discount, the quantities in each tier must be met by a per SKU basis.

Tier 1: Minimum Order - 576 units

Tier 2: 1152 units of one SKU

Tier 3: 2592 units of one SKU

Tier 4: 5184 units of one SKU

Contact us for per jar pricing at each of the tier levels.

Bulk Discount Tiers

Bulk orders with one SKU at higher unit quantities are eligible for discounts beginning at 250 pounds. Ordering larger unit quantities of your blends means your cost per box will decrease.

Discounts will not apply to a mix and match order of multiple blends, in order to qualify for the discount, the quantities in each tier must be met by a per SKU basis.

Tier 1: Minimum Order - 100 pounds

Tier 2: 250-499 pounds of one SKU

Tier 3: 500+ pounds of one SKU

Contact us for per bulk box pricing of the tier levels.

Outsourcing Labels

Spices, Inc. will accept labels sourced by the client from an independent label company as long as they meet the following requirements:

- All labels sourced from independent companies must come to Spices, Inc. on a roll with a hollow core diameter of 2 - 3 inches, and not exceeding 8" in total with media
- The face of the label must face outward from the roll
- Labels must print on the roll horizontally, 1 x 1, and be landscape oriented so the lead edge is the left side of the label
- Liner thickness 2 mil - 10 mil
- Label + adhesive thickness 5 mil - 15 mil
- The maximum measurements of labels vary per jar
 - 5.5 oz jar: 3" height by 5.25" (5 ¼") width
 - 4 oz jar: 2.5" (2 ½") height by 5" width
 - 8.4 oz jar: 3.25" (3 ¼") height by 6" width
- Clients choosing to provide their labels via a third party are required to submit a proof of their label to us before placing an order for labels so we may confirm the net weight, label dimensions, and ingredient list. It is the responsibility of the customer to ensure all labeling requirements are met.
- When placing an order for custom labels, please round up to nearest hundred. For example, if you're ordering 576 units, order a minimum of 600 labels per SKU (most label companies may require you to order in quantities of 50, 100, etc.)
- The labels must also have the matrix removed to properly work with our labeling machine

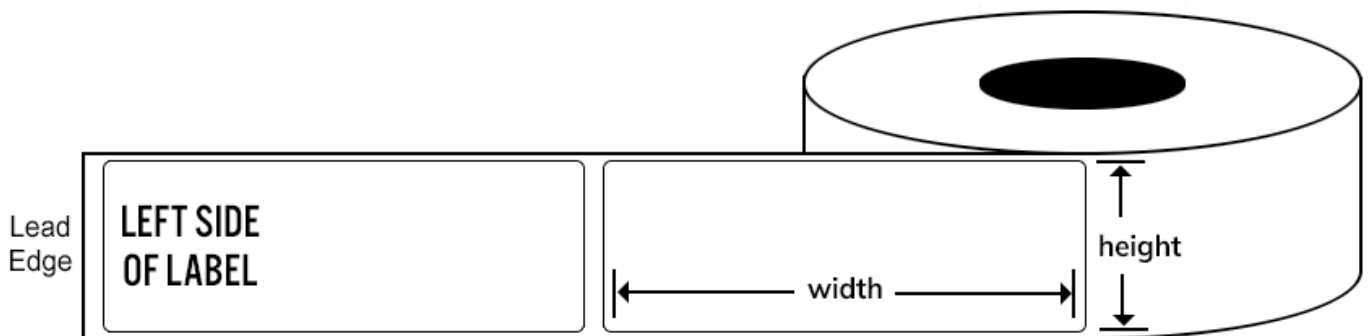

Image for reference only. Not to scale.

The client is responsible for the purchase and shipment of their outsourced label to Spices, Inc.

Spices, Inc. will accept responsibility for housing outsourced labels, monitoring stock levels, informing client of said stock level with each order, and the machine application of labels to the jar.

Custom Blend Program Fees

Effective 09/01/2026

Custom Blend Set-Up Fee — per custom recipe Includes: • minor consultation services • 2 one pound test batches • test batch shipping • product setup	\$400
Recipe Conversion Fee — assistance converting client's recipe into the correct units and proportions	\$100
Test Batching Fee — after the initial set-up fee, the production and shipping of each additional test batch beyond the specified limit of 2 batches	\$100
12 Month Test Batching Fee — If a blend has not been ordered in 12 months or more, there will be a fee for another test batch to confirm the blend before ordering. If a blend has not been ordered in 24 months or more the recipe will no longer be kept on file and you will need to start the setup process from the beginning.	\$100
Certification Fee — Organic, Kosher, GMO-Guard	\$100 per certification per SKU

Payment of all fees is required prior to commencing work, and fees are non-refundable.
