

White Label Program

White Label

The White Label program offers the option of choosing from our extensive product line, packaged in your choice of one of our 3 jar packaging options with your company's branding and logo.

Participating in the white label program has benefited many of our clients. We do all of the heavy lifting (sourcing, labeling, filling, sealing, packaging) so all you have to do is put your products on the shelf when they arrive. This allows you to spend time marketing your brand instead of dedicating labor hours and valuable space to the production and packaging of spices and seasoning blends.

Our clients cover all corners of the country and range from small gourmet markets, farmer's markets, olive oil stores, independent spice and tea shops, to butchers, delis, restaurants, and caterers. Our team maintains close partnerships with our clients, and have worked through their business experiences with them. We've gained a wealth of knowledge regarding their successes, issues, and needs, and can pass our insights along to you. Spices, Inc. continually works to adapt to the everchanging demands of the market, providing you with the most efficient and fruitful solution to your white labeling needs.

Spices, Inc. is a SQF (Safe Quality Food)-certified facility. Our facility, our protocols and our own suppliers are required to adhere to globally recognized standards, verified by annual third-party audits. Our practices are documented, our products are stringently monitored, our employees are rigorously trained.

SIZES

SJ1 - 5.5 oz plastic jar

SJ2 - 4.0 oz glass jar

SJ3 - 8.4 oz plastic jar

MINIMUMS

The minimum total order quantity is 16 cases for our two smaller jar options and 12 cases for our larger jar option. The minimum number of cases per product SKU is 1 case, which means you can enter the program with a selection of up to 16 products, or as little as 1 product. Products must be ordered in increments of 1 case per product SKU. Each case contains 12 jars.

LABEL PROCESS

Spices, Inc. can create customized labels, printed in house, for clients participating in our White Label Program. Our label template is designed to accommodate different sizes and shapes of logos as well as offer variety in formatting. You can customize the label template by selecting from an assortment of optional fields.

If using our template, please send us a hi-res image of your logo. We welcome logos in the following formats: SVG, TIFF, EPS, Adobe (PS and AI), and InDesign. While JPG and PDF are acceptable, we strongly recommend using one of the aforementioned file types for optimal results. Additionally, please provide your store information, including company name, address, phone number, and web or Facebook address.

Required fields: product name, ingredient list, net weight (oz), best by date, logo and company information.

Optional fields: company story, UPC/barcode.

After sending us your logo, company information, and which fields you wish to include, we will create a draft of your label for your approval. Once approved, you can place your order immediately and it will typically be processed and shipped within 48 hours (about 2 days).

Some White Label Program clients have the option to use custom labels purchased from an outside vendor. This is permissible only if each product on the order meets a minimum quantity of 288 units per product SKU. Custom labels must meet the requirements listed in the Outsourcing Labels section of the Label Catalog & Requirements pages.

SETUP FEES

If using our template, there is a one-time set-up fee of \$100 for the creation of your label and installation of your product information into our database. If you would like a different label design for each label, there is a \$100 fee per product label.

If you choose to send Spices, Inc. your preprinted labels, there will be a \$100 fee for installing your product information into our database.

Jar Packaging Minimums

White label clients must select from our list of available products and place orders by using each product's unique SKU. Clients are permitted to select 1-16 products for the initial 16 cases for the 5.5 oz or 4.0 oz jar option or 1-12 products for the initial 12 cases for the 8.4 oz jar option. Each case contains 12 jars.

If a wider selection of products is desired, you may order additional SKUs at a minimum of 1 case per SKU. Orders over the 16 case minimum of the 5.5 oz or 4.0 oz jar option, must be ordered in increments of 8 cases with 1 case per SKU. Orders over the 12 case minimum of the 8.4 oz jar option must be ordered in increments of 6 cases with 1 case per SKU.

DISCOUNT TIERS

Orders of higher total unit quantity are eligible for discounts at 72 cases. The following two tiers represent each price break. Our white label program gives you a wholesale price on jars as it is, but ordering in larger quantities will result in even further discounts.

Please reach out about the cost of your order with the discounts applied at 72 cases, as this is dependent on your product mix.

Tier 1: 16 cases - Minimum Order

Tier 2: 72 cases

Contact our team with any questions at whitelabel@spicesinc.com.

Label Catalog & Requirements

LABEL TEMPLATE

Labels are printed internally using the template design seen below. Printing and application are completed by Spices, Inc.

To create your label, we need your company name, address, logo, and desired product names. UPC codes may be added, however, you must provide them and there is an additional fee to create your UPC code database.

Labels are 5" wide by 2" high and printed on glossy white.

When preparing logos for print, the highest quality images are desired. The best options include: Scalable Vector Graphics (SVG), Adobe Illustrator documents (AI), TIFF, EPS, InDesign documents (INDD), and Photoshop documents (PSD).

Our story begins with lorem ipsum dolor sit amet, our story begins with lorem ipsum dolor sit amet, our story begins with lorem ipsum dolor sit amet, with lorem ipsum dolor sit ametour story begins with lorem ipsum dolor sit amet.		INGREDIENTS: Salt, garlic, black pepper, onion, red pepper flakes, rosemary, basil, Mediterranean oregano, and parsley.
		SHAKE WELL BEFORE USE. STORE IN A COOL, DRY PLACE.

OUTSOURCING LABELS

Outsourced labels can only be used in the white label program for orders of 24 cases/288 units or more per SKU.

Spices, Inc. will accept labels sourced by the client from an independent label company as long as they meet the following requirements:

- All labels sourced from independent companies must come to Spices, Inc. on a roll with a hollow core diameter of 2" - 3", and not exceeding 8" in total with media
- The face of the label must face outward from the roll
- Labels must print on the roll horizontally, 1 x 1, and be landscape oriented so the lead edge is the left side of the label
- Liner thickness 2 mil - 10 mil
- Label + adhesive thickness 5 mil - 15 mil
- The maximum measurements of labels vary per jar
 - 5.5 oz jar: 3" height by 5.25" (5 ¼") width
 - 4 oz jar: 2.5" (2 ½") height by 5" width
 - 8.4 oz jar: 3.25" (3 ¼") height by 6" width
- Clients choosing to provide their labels via a third party are required to submit a proof of their label to us prior to placing an order for labels so we may confirm the net weight, label dimensions, and ingredient list. It is the responsibility of the customer to ensure all labeling requirements are met.
- When placing an order for custom labels, please round up to nearest hundred. For example, if you're ordering 288 units, order a minimum of 300 labels per SKU (most label companies may require you to order in quantities of 50, 100, etc.)

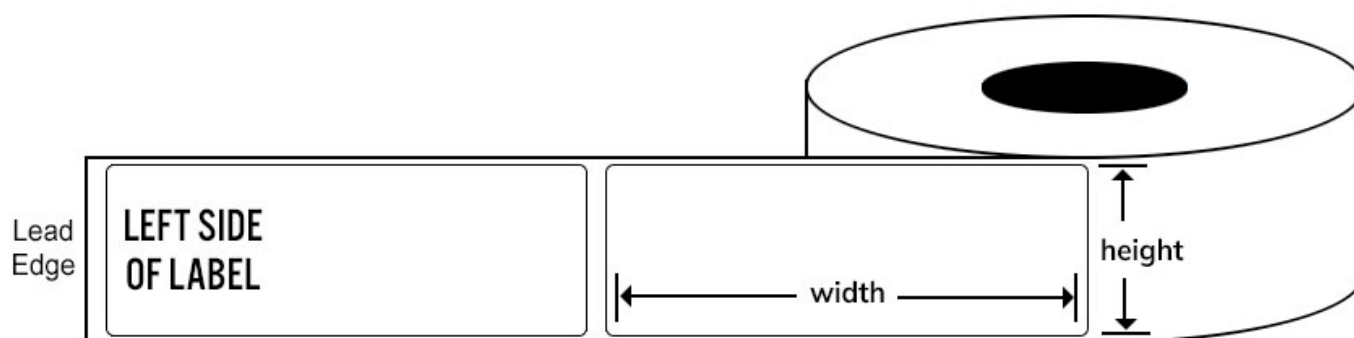

Image for reference only. Not to scale.

The client is responsible for the purchase and shipment of their outsourced label to Spices, Inc.

Spices, Inc. will accept responsibility for housing outsourced labels, monitoring stock levels, informing customer of said stock level with each order, and the machine application of labels to the jar.

White Label Program Fees

Effective 09/01/2026

White Label Creation Fee (Template Labels) — inserting client's logo and info into a Spices, Inc. label template to create a unique label for all future products.	\$100
White Label Set-Up Fee (Outsourced Labels) — preparing and entering client's product info into a database	\$100
UPC Codes Fee — Spices, Inc. does not provide UPC codes — if UPC codes will be included on label, client must provide UPC codes	Contact Us For Quote

Payment of all fees is required prior to commencing work, and fees are non-refundable.
